

HOLCOMB BRIDGE ROAD RAILROAD CROSSING IMPROVEMENT PROJECT

The City of Norcross is advising residents to expect slight delays during upcoming road improvements of the downtown area's railroad crossing. Construction will include raising the intersection of Holcomb Bridge Road and Thrasher Street by five feet in order to improve safety, and is expected to wrap up in late May. A quick and convenient detour route has been suggested by the City to help visitors and residents still easily navigate to their favorite unique shops and restaurants in the historic downtown.
